Skills:

- Computer: Salesforce (Beginner), Adobe Acrobat (Intermediate), Microsoft Word, Excel, SharePoint, Outlook, and PowerPoint (Advanced)
- Programming: Python, R, Java, C, C#, C++, Tableau, Go, Ruby on Rails, SAS JMP, SQL, NumPy, APIs, JavaScript, Microsoft Power BI, Power Automate, Wolfram Language, KNIME, MATLAB, and Power Query (Beginner), HTML, Software Testing, Agile Testing, and CSS (Intermediate)
- Languages: Spanish (Beginner)

Certificates:

- Introduction to Programming Using Python
- LambdaTest Software Testing & Test Automation Professional Certificates
- Microsoft Career Essentials in Software Development, System Administration, Business Analysis, & Azure AI Professional Certificates
- Wolfram Machine Learning Statistical & Statistics Foundations Professional Certificates
- KNIME Data Science Professional Certificate
- SS&C Prism Robotic Professional Certificate
- GitHub Career Essentials Professional Certificate
- Docker Foundations Professional Certificate
- ServiceNow IT Leadership Professional Certificate
- Aha Product Management Professional Certificate
- Weavitate Vector Databases Professional Certificate
- Kong Microservices Foundations Professional Certificate
- PagerDuty DevOps Professional Certificate
- Snowflake Data Engineering & Generative AI Professional Certificates
- LinkedIn Learning & Udemy Courses: Data Science Foundations, Python vs. R for Data Science, Learning SQL Programming, Ruby on Rails Models & Associations, AWS Certified Cloud Practitioner Exam Preparation, Designing Restful APIs, Business Analysis Foundations, DevOps for Data Scientists, Learning Data Science: Using Agile Methodology & Understanding the Basics, Python in Excel, Introduction to Analytics Engineering, Project Management Foundation Requirements, Data Engineering Foundations, Managing Data with Microsoft 365, SQL for Statistics Essential Training, NumPy Essential Training: Foundations of NumPy, Matplotlib & Linear Capabilities, Python Functions for Data Science, Basic of Data Visualization Analysis, Artificial Intelligence Foundations: Machine Learning, and Big Data in the Age of AI, Software Architecture : Patterns For Developers, Python for Data Science Tips, Tricks, and Techniques, DevOps Foundations, Cleaning Bad Data in R, Foundational Math for Machine Learning, Learning Rest APIs, Platform Engineering Foundations, Data Engineering with dbt, Probability Foundations with Data Science, Regression Analysis Fundamentals, Site Reliability Engineering: Service-Level Agreements & Objectives, Apache Spark Essential Training: Big Data Engineering, Machine Learning With Python: Logistic Regression & Association Rules, Hands-on start to Wolfram Mathematica, Architecting Big Data Applications: Batch Mode Application Engineering, Pytorch Essential Training: Deep Learning, Data Structures in JavaScript: BSTs, Queues, and Stacks, Fundamental of Becoming a Machine Learning Engineer Learning Path, MATLAB Essential Training, Customer Service: Problem-Solving and Troubleshooting, Become a Programmer: Foundations Learning Path, Become a RESTful API Developer Learning Path, Relational Databases Essential Training, Master C Language Pointers, Phone-Based Customer Service, Creating Positive Conversations With Challenging Customers, Develop Your SPSS Skills Learning Path, Learning Codeless Machine Learning with KNIME Learning Path, Data Engineering Pipeline Management with Apache Airflow, Data Pipeline Automation with GitHub Actions Using R and Python, Systems Engineering with SysML, Java: IDE Overview, Programming Foundations : Artificial Intelligence, Scala Essential Training For Data Science, Tips to Boost Your Analytical Thinking, Introduction to Quantum Computing, Site Reliability Engineering Essential Training, Debugging C Code, Programming Foundations: Application Architecture, C#: Delegates, Events, and Lambdas, Getting Started as a Java Developer Learning Path, Machine Learning in Telecommunication: From Basics to Real-World Cases, C# Foundations : From Basics to Building Blocks Learning Path, Computer Vision for Data Scientists, Computer Architecture Essentials, Master SQL for Data Science Learning Path, Deploying Scalable Machine Learning for Data Science, Object-Oriented Programming with C++, Complete Guide to Parallel and Concurrent Programming: C++ , Java, & Python, Product Development & Systems Engineering, Introduction to Java EE, Reliability Engineering Statistics, Python for Computer Vision with OpenCV and Deep Learning, Executive Briefing : Computer Vision, Deep Learning & Robotic Process Automation (RPA)
